PRAKASH THANGARAJ

Senior Full-Stack Engineer | +353 894750501 | mailfromprakash@gmail.com | Dublin, Ireland
https://www.linkedin.com/in/prakaships/ | https://github.com/ipsrepo | https://prakasht.netlify.app/

PROFESSIONAL SUMMARY:

Lead Full-Stack Software Engineer with 10+ years of experience architecting scalable, distributed systems for Fortune 500 clients (NHS, Adobe, T-Mobile). Expert in JavaScript/TypeScript, React, Node.js, microservices, and AWS cloud infrastructure. Proven track record optimizing system performance, building secure GDPR-compliant solutions, and mentoring high-performing engineering teams. Technical leader focused on establishing architectural standards, improving code quality, and driving modern development practices in agile environments.

TECHNICAL SKILLS:

- **Core Technologies:** JavaScript, TypeScript, HTML5, CSS3/SCSS, React.js, React Native, Angular, Python, Redux/Thunk/Saga, RXJS, NGRX.
- **Backend & Database:** Node.js, Express.js, MongoDB, MySQL, Microservices architecture, REST APIs, GraphQL.
- **Frameworks & Libraries:** Preact, Alpine.js, Tailwind CSS, Bootstrap, PrimeNG, Formik, Swagger documentation
- **Adobe Platforms:** Adobe Experience Manager (AEM), Adobe Edge Delivery Services (EDS), DOM-based rendering, CRX
- **Testing & Quality:** Jest, React Testing Library, Cypress, Jasmine, Karma, Test-Driven Development (TDD)
- **DevOps & Tools:** AWS, Docker, GitHub Actions, Terraform, Bitbucket, Azure DevOps, CI/CD pipelines, Jira
- **Accessibility & Compliance:** WCAG 2.1/2.2, Lighthouse audits, GDPR compliance, Git Guardian (GG Shield) security scanning

PROFESSIONAL EXPERIENCE:

SENIOR DIGITAL ENGINEER – DIGITIDE SOLUTIONS (CONNEQT BUSINESS)

Apr 2024 – Jan 2026

Global digital transformation consultancy delivering enterprise-grade web solutions for Fortune 500 clients.

- Architected full-stack web applications for Maruti Suzuki (India) and T-Mobile (US) using JavaScript, TypeScript, Alpine.js, Preact for frontend and REST, GraphQL APIs for backend integration with Adobe Experience Manager (AEM) and Edge Delivery Services (EDS)
- Implemented comprehensive test automation and CI/CD pipelines using DevOps practices: achieved 95% Jest test coverage, managed deployments through GitHub Actions and infrastructure automation, Docker containerization, and Git Guardian security scanning ensuring enterprise-grade code quality and security compliance across production environments
- Reduced page load times by 40% through advanced DOM manipulation, custom event handling, PubSub design patterns, and optimized API data fetching strategies enabling cross-repository data synchronization
- Implemented GraphQL APIs with custom resolvers for dynamic content delivery, page routing solutions, and secure data handling, achieving mobile-first responsive design across all devices
- Achieved 95% Jest test coverage covering both frontend components and API integration layers, while ensuring WCAG 2.1 AA compliance through automated accessibility testing with NVIDIA tools
- Mentored 3 junior developers across frontend and backend technologies, conducted peer code reviews in agile environment using GitHub, GitLab, Docker, and Git Guardian security scanning, ensuring enterprise-grade code quality

SOFTWARE DEVELOPMENT ENGINEER – Optum (EMIS HEALTH)

Sep 2023 – Jan 2024

Leading UK healthcare IT provider delivering clinical systems to NHS and European healthcare organizations.

- Enhanced Extract Builder full-stack application for UK NHS, streamlining clinical data querying with React TypeScript frontend and REST API backend serving government reporting workflows for 50+ healthcare trusts

- Architected complex data processing pipelines managing clinical and ethnicity code systems, ensuring GDPR-compliant data handling, secure API communication, and accurate government submissions
- Optimized end-to-end performance using Cohort-builder-kit, Query Manager, and Query Builder Library for both frontend rendering and backend query processing, improving query performance by 35%

SOFTWARE PROGRAMMER - MINDPRO TECHNOLOGIES

Apr 2014 – Sep 2023

Full-service software development company specializing in enterprise web applications and digital solutions.

- Delivered 12+ production-ready full-stack web applications and chatbots using React, Angular, Node.js, Express.js with state management via Redux, NGRX, and RXJS, and backend integration with MongoDB and MySQL for clients including Matrix eServices (US insurance) and Quess (Taskmo App)
- Architected reusable component libraries, RESTful API services, and design systems reducing development time by 30% and ensuring consistent UI/UX and data integrity across multiple full-stack projects
- Designed and documented REST APIs using Swagger, implementing secure authentication, data validation, and establishing clear communication protocols between frontend and backend teams
- Implemented Test-Driven Development (TDD) practices across the entire stack using Jest, Jasmine, Karma, and React Testing Library for frontend, plus API endpoint testing, achieving 85%+ code coverage
- Led Agile Scrum teams conducting daily standups, sprint planning, and code reviews while mentoring 5+ developers in full-stack best practices, API design, and performance optimization.

PROJECTS:

Taskmo App – Multi-Dashboard Platform (Quess Corp) | *React.js, Node.js, Redux, MySQL*

- Developed comprehensive full-stack task management platform with three role-based dashboards (Admin, User, Retailer) serving 10,000+ active users across India's gig economy workforce
- Built React.js frontend with Redux for centralized state management and real-time data synchronization, integrated with Node.js/Express.js backend and MySQL database for secure data handling, user authentication, and analytics reporting

Maruti Suzuki Digital Platform | *JavaScript, Preact, Adobe EDS, REST APIs, Jest*

- Built dynamic automotive web platform with core JavaScript and Preact integrated with Adobe Edge Delivery Services, implementing custom event systems, advanced DOM manipulation for interactive UI components, and REST API integration for inventory and vehicle data management

T-Mobile Enterprise Solution | *TypeScript, Alpine.js, AEM, GraphQL, Docker*

- Developed scalable full-stack components with TypeScript and Alpine.js frontend unified via AEM, implementing GraphQL APIs for efficient data fetching, PubSub design pattern for cross-repository data synchronization, and Git Guardian security compliance for enterprise-grade security

Matrix eServices Insurance Platform | *Angular, TypeScript, NGRX, PrimeNG, REST APIs, Azure*

- Created multi-repository eClaim and eService applications with Angular frontend and NGRX state management, integrated with RESTful backend services for insurance processing, implementing TDD with Karma/Jasmine and CI/CD via Azure DevOps for consistent deployment across US markets

AI-Powered Assistance Chatbot | *Angular, TypeScript, Node.js, REST APIs, Speech API*

- Developed multi-language conversational chatbot with Angular frontend and Node.js backend, featuring voice-activated surveys, maternity benefit calculations, MDN Speech Synthesis API integration, and custom data visualization using pure JavaScript, eliminating dependency on external chart libraries

EDUCATION & CERTIFICATES:

- MSc in Information Systems with Computing | Dublin Business School (DBS), Ireland
- Bachelor of Engineering in Computer Science | 2013 (**CGPA: 8.11)**
- HackerRank Frontend Developer (React) Certificate | Advanced JavaScript Mastery Certificate
- Advanced React complete guide Certificate | AI-Powered Summarisation & Research Certificate
